

THE Integrator

our solution for easy installation in mortar applications

Pre-install our stainless steel insert to make hardscape lighting easier...

- › Stainless steel insert supplied with fasteners.
- › Flexible conduit attached for easy connection behind the wall.
- › Maintains alignment and level fixture for final installation.
- › Designed for 1/2" mortar bed.
- › Fixture inserts easily after mortared cap is installed.

Integrators are available in three sizes to accommodate all of our hardscape lighting fixtures.

Integral Lighting fixtures insert easily after the mortared cap is installed.

Perfect for use with brick, bluestone, stucco, cap stones, travertine, and precast concrete.

How to...

1. Mount the Integrator insert plate with the supplied fasteners.
2. Mortar cap stone in place.
3. Insert the fixture into the Integrator, leaving a small amount of wire directly behind the fixture to easily remove it in the future.
4. Connect the fixture to the low voltage cable behind the wall, utilizing the attached conduit.
